Are mobile battery energy storage systems a viable alternative to diesel generators?

Mobile battery energy storage systems offer an alternative to diesel generators for temporary off-grid power. Alex Smith, co-founder and CTO of US-based provider Moxion Power looks at some of the technology's many applications and scopes out its future market development.

Why is mobile energy storage a stranded asset?

Stationary storage lacks flexibility, suffers from low utilization and from the risk of becoming a stranded asset. Power Edison addressed these issues by developing mobile energy storage platforms:

TerraCharge(TM) and AquaCharge(TM) for mobile land-based and water-based mobile energy storage respectively.
