## Battery cabinet in main control room

What is a battery cabinet / rack?

EverExceed designs customized battery cabinets / racks for individual batteries. The cabinet or racking system can be specified to accommodate any battery cell. From flooded to sealed, from lead acid to nickel cadmium and from vertical to horizontal all kinds of battery cabinet / rack can be designed flexibly to save the space in battery room.

What type of batteries are used in energy storage cabinets?

Lithium batteries have become the most commonly used battery type in modern energy storage cabinets due to their high energy density, long life, low self-discharge rate and fast charge and discharge speed.

How effective are battery rooms?

Battery rooms are only as effective as the batteries they house. Speak to our team to find the right solution for powering your operations. Build a safe, efficient battery room for lead-acid, lithium-ion & EV batteries. Learn layout, ventilation & charging tips to maximise safety & performance.

How do you design a safe battery room?

A well-designed layout is the backbone of a safe battery room. Begin by allocating sufficient space for each battery system, allowing for clear access during installation, charging, or maintenance. Traction and semi-traction batteries, which are handled frequently, should be positioned near entry points or charging stations for convenience.
