
Cambodia rooftop solar panels

Can rooftop solar power be used in Cambodia?

Further, H.E. emphasized that "Principles for permitting the use of Rooftop Solar Power in Cambodia" will provide more clarity on the use of rooftop solar power of electricity consumers.

Does Cambodia need solar power?

Solar power is now taking over a much larger portion of the total energy mix in Cambodia, especially as a number of utility-scale solar power plants have come online in recent years. The long-term Power Development Master Plan 2022-2040 sets out the long-term energy policy for Cambodia and requires a bigger role for renewables.

What is the current state of solar energy in Cambodia?

The Current State of Solar Energy in Cambodia Cambodia's solar energy sector has grown significantly in recent years. As of 2022, the country had installed around 432 MW of solar capacity, with a goal of reaching 1,000 MW by 2030.

What are the key solar projects in Cambodia?

Key solar projects include: Bavet Solar Power Plant (60 MW) -- Cambodia's first large-scale solar farm. Kampong Chhnang Solar Farm (100 MW) -- A major investment in clean energy. Floating Solar Plant in Pursat -- The country's first floating solar project, enhancing land-use efficiency.
