## Can solar panels be used for roof insulation

Do rooftop solar panels provide insulation?

One of the most common questions is whether a rooftop solar array can help with the roof's insulation. The answer is that rooftop solar panels do provide a degree of insulation. Let's find out why. The diverse climate of Australia ranges from scorching summers to chilly winters.

Do solar panels need insulation?

As mentioned, solar panels generate energy by harnessing sunlight. However, their efficiency can be affected by extreme temperatures. This is where insulation comes into the picture: Temperature regulation: Insulation helps stabilise indoor temperatures, reducing the strain on heating and cooling systems.

Can solar panels protect your roof?

Go green today! Ensure that your house's most crucial loads stay on even during power outages without overspending on a battery backup.
