
Canberra Rainproof Power Station Generator BESS

Will the Bess power Canberra in 2026?

Scheduled to begin operations in 2026, the BESS will store enough renewable energy to power one-third of Canberra for two hours during peak demand, playing a pivotal role in achieving the ACT's net-zero emissions target by 2045.

What is Bess & evoenergy?

A partnership between the ACT Government and global energy storage leader Eku Energy, the 250 megawatts BESS will be part of the Evoenergy distribution network. It will store enough renewable energy to power one-third of Canberra for two hours during peak demand.

When will a solar battery be operational in Canberra?

The battery is expected to be operational in 2026 and will be able to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods.

What is the Big Canberra battery project?

Installation is underway on behind-the-meter batteries at nine sites. The Big Canberra Battery project will deliver an ecosystem of batteries across the ACT to ensure that our electricity grid remains stable. The Big Canberra Battery project includes the installation of: installation of behind-the-meter batteries at nine government sites.

Eku Energy reached financial close on the 2-hour duration Williamsdale grid-forming BESS earlier this month. The Williamsdale BESS is also part of the ACT government's ...

The Australian Capital Territory (ACT) government and Eku Energy have commenced construction of the Williamsdale Battery Energy Storage System (BESS), a 250 ...

Industrial battery energy storage systems (BESS) trusted by 200+ construction, mining & industrial sites across Australia.

The Williamsdale Battery Energy Storage System (BESS) will enhance energy security and reliability by storing renewable energy for use during peak demand. As part of the ACT ...

The Australian Capital Territory (ACT) government and Eku Energy have officially commenced construction of the Williamsdale ...

The large-scale battery energy storage system (BESS) will provide at least 250 megawatts (MW) of power. This is enough energy to power one-third of Canberra for two ...

A partnership between the ACT Government and global energy storage leader Eku Energy, the 250 megawatts BESS will be part of the Evoenergy distribution network. It will ...

A partnership between the ACT Government and global energy storage leader Eku Energy, the 250 megawatts BESS will be part ...

Eku Energy reached financial close on the 2-hour duration Williamsdale grid-forming BESS earlier this month. The Williamsdale ...

The ACT Government and Eku Energy have begun construction on the 250MW/500MWh Williamsdale

Battery Energy ...

The ACT Government and Eku Energy have begun construction on the 250MW/500MWh Williamsdale Battery Energy Storage System (BESS), which will support the ...

The Williamsdale BESS is part of the ACT Government's Big Canberra Battery project and will play a critical role in supporting the ...

The 500MWh BESS is expected to enter construction later this year. Image: ACT government. Battery energy storage developer Eku Energy has reached a financial close for ...

The 500MWh BESS is expected to enter construction later this year. Image: ACT government. Battery energy storage developer Eku ...

The Williamsdale BESS is part of the ACT Government's Big Canberra Battery project and will play a critical role in supporting the ACT's transition to renewable energy and ...

The Australian Capital Territory (ACT) government and Eku Energy have officially commenced construction of the Williamsdale Battery Energy Storage System (BESS). The ...
