
China Communications and Huawei jointly build 5G base stations

Where are 5G base stations located in China?

At the Great Wall scenic area, the Beijing Yanqing District Government and China Unicom Beijing have jointly deployed 10-gigabit 5G-Advanced base stations at scale. This offers uninterrupted network coverage both on the ground and in low-altitude (below 300 meters) airspace.

How big is Huawei's 5G network in Beijing?

According to Huawei, this large-scale commercial three component carrier (3CC) network covers over 10 million people in Beijing. The deployment aims to ensure comprehensive 5G coverage and extends 85% 5G-Advanced coverage within Beijing's 4th Ring Road and the Municipal Administrative Center.

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

Which 5G networks are being deployed at the Workers' Stadium?

China Unicom Beijing, Sinobo, GTVerse, and Huawei have created a world-leading integrated 5G-Advanced network at the Workers' Stadium. A large number of 5G-Advanced 3CC sites have been deployed both inside and outside the stadium, enabling the 10-gigabit 5G-Advanced network to support the widest frequency range anywhere in the world.

This network's rollout not only showcases China's technological flair but also tests the network's robustness in a complex urban setting. Focusing on real-world applications, ...

The 10-gigabit 5G-Advanced low-altitude economy innovation base drives low-altitude economic development in Yanqing. At the Great Wall scenic area, the Beijing Yanqing ...

Now Huawei and Beijing Unicom have jointly completed the commercial use of the world's largest 5G-A 3CC network solution. Inputs further reveal that Beijing Municipal ...
