## China distribution switchgear in Chile

What is air insulated switchgear?

Air insulated switchgear (AIS) is an auxiliary distribution unit used to disperse the electrical energy of the main transmission unit fed by a large distribution transformer. adopts the air as the insulation media designed voltage ranging from 11KV to 36KV medium voltage power distribution system.

How do foreign suppliers enter the Chilean market?

In general, foreign suppliers enter the Chilean market by appointing an agent, distributor, or wholesaler. Most are small-to-medium size firms. Several large firms handle different product lines and operate as wholesalers. Almost all the firms have their main offices in Santiago.

What is a switchgear used for?

It includes in one unit two switches that can connect the load to either or both main conductors, and a fusible switch or circuit breaker and switch that feed a distribution transformer. This type of switchgear is used for medium-voltage power distribution, from 7.2kV to about 36kV volts.

Are franchise companies regulated in Chile?

Franchise companies operating in Chile are subject to the same general Chilean trade laws as all companies. Royalties and fees are subject to a withholding tax ranging from 15 to 35 percent and contracts are usually for five to ten years. U.S. companies are encouraged to register their trademarks prior to entering the Chilean market.
