
Costa Rica Off-Grid Solar Container Exchange

Can solar power diversify the energy mix in Costa Rica?

While hydroelectric power dominates the energy mix at approximately 80% of electricity production, solar energy, though currently a smaller contributor, holds significant potential to diversify and stabilize the grid. This paper investigates Costa Rica's renewable energy journey, emphasizing solar power's evolving role.

Who is the target market for solar energy in Costa Rica?

According to the Costa Rican Institute of Electricity (ICE) and the Costa Rican National Power and Light Company (CNFL), both government entities, the target market for solar energy in Costa Rica remains to be households or companies that consume between 200kw/h and 3,000kw/h. ICE and CNFL have been installing photovoltaic systems.

Can solar power improve Costa Rica's energy security?

Solar energy, though currently a minor player, offers untapped potential to enhance Costa Rica's energy security. The country's tropical climate ensures consistent sunlight, making solar PV systems ideal for both utility-scale and distributed generation.

Is solar energy a viable alternative to Hydro-heavy grids in Costa Rica?

Solar energy, while underexplored in Costa Rica compared to hydro and geothermal, has gained attention in recent literature. Smith and Paladino (2021) argue that solar photovoltaic (PV) systems offer a decentralized solution to complement hydro-heavy grids, reducing vulnerability to seasonal fluctuations.
