## Dc breaker for solar for sale in Greece

Can a circuit breaker be used in a solar energy system?

Typical circuit breakers are ineffective in solar-related energy systems based on alternating currents. However, manufacturers specifically made our direct current circuit breaker so you can use it in solar energy systems. That is to give your solar panels, solar battery, inverter, and household devices the proper protection they need.

What is a direct current miniature circuit breaker?

The direct current miniature circuit breaker provides optimization products for direct existing system applications such as photovoltaic systems (PV) and Energy storage systems (ESS). Manufacturers commonly place them inside circuit breaker panel, also known as breaker box.

What is a miniature circuit breaker?

Our Miniature Circuit Breakers (MCBS) is top of the line providing near-instant responses to faults such as high current. Magnetically protected, these circuit breakers can provide quality protection to primary circuits and come in various types to give the same protection in multiple circuits. Modular design.
