
Delta uninterruptible power supply

What is Delta ups?

The Delta UPS business has more than a decade in designing, manufacturing and marketing UPSs globally. Delta is committed to innovating technically superior products and providing energy efficient solutions for a wide range of home, office, data center and industrial applications.

Why should you choose delta power supply units?

The Delta line of uninterruptible power supply units includes superb options trusted by leading organizations across a wide array of industries, from financial institutions to medical centers. Small business owners also look to Delta for power solutions that keep their vital equipment running no matter what happens.

Why should a business use a Delta ups?

Delta UPSs are known for efficiency and for saving not just energy, but money that would be wasted by less advanced devices that require too much power. The growth of a business should never be at risk of limitation or delay due to avoidable technical restrictions of existing power hardware.

What types of UPS does Delta offer?

Delta's UPS product portfolio includes one- and three-phase UPSs as well as online and line-interactive systems. The full product range comes in four models based on load type:
