

# E7 appears in the battery cabinet

What is an E7 error code?

An e7 error code is a type of error code that signals an issue with the calibration of a specific appliance, such as a washer or dryer. What are the possible causes of an e7 error code?

Can an E7 error code affect the performance of my appliance?

Yes, an e7 error code can affect the performance of your appliance if left unresolved. To ensure your appliance's continued performance, it is important to address the e7 error code as soon as possible. The e7 error code typically indicates that one of the sensors used by the appliance has malfunctioned.

What is an external battery cabinet (EBC)?

The External Battery Cabinet (EBC) is available in two models to meet the needs of the Eaton 93E UPS product line. The following sections detail the battery specifications, battery runtimes, and the environmental and safety specifications for the UPS. Service conferrable 0.5-34A per string, with overall maximum of 34A (limited by input current).

What happens if you use a different battery in Eaton cabinets?

Use of any other battery type or mixing battery letter designation and sizes inside Eaton cabinets will damage equipment and void the product warranty. When replacing batteries use the same manufacturer and part number originally supplied with the unit to ensure correct harness fit and terminal landing.
