## Export PV module weight

How many PV modules did China Export in 2023?

Separately, market research firm InfoLink has also released an analysis report based on customs data, which pointed out that from January to December 2024, China exported a total of 235.93GW of PV modules, an increase of 13% compared to 207.99GW in the same period in 2023. Comparison of Chinese PV module exports in 2023 and 2024. Source InfoLink

Where do solar PV exports come from?

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination. Ember China solar export dataset provides the following information: The IEA has stated that China's solar photovoltaic exports account for 80% of the global market.

Which countries import PV modules from China?

In December, China exported approximately 16.63GW of PV modules, a 9% increase compared with the 15.2GW in November. The ranking of countries importing PV modules from China was Brazil, the Netherlands, India, Saudi Arabia and Spain. The total monthly imports of these major countries accounted for about 42% of the global market.

What is the export value of PV products?

"The export value of PV products has exceeded RMB200 billion for four consecutive years, setting a new record high," said Daliang Lv, spokesperson for the General Administration of Customs and director of the Department of Statistics and Analysis.

In 2024, the export value of solar photovoltaic modules worldwide stood at approximately \*\*\*\* billion U.S.

I am currently researching the component weights separately of the new generation n-type PV modules, especially focusing on the solar cell, EVA, ...

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination.

China's total module exports from January to July 2025 reached 148.6 GW, down 2% YoY from 151.48 GW. In July 2025, the top five single-country importers of Chinese ...

The export volumes of wafers, cells, and PV modules reached 70.3GW, 39.3GW, and 211.7GW, respectively, with year-on-year growth rates of 93.6%, 65.5%, and 37.9%. This ...

Export photovoltaic Components are a trade activity with broad prospects, especially amid the accelerating global energy transition. Combined with the latest 2025 ...

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

Discover data on Photovoltaic: Import and Export in China. Explore expert forecasts and historical data on economic indicators across 195+ countries.

Overview This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the ...
