# Factory price incomer breaker in Thailand

How many jobs are lost by factory closures in Thailand?

These closures caused 15,342 job losses by May, averaging about 3,000 jobs per month. The Federation of Thai Industries is urging government support to prevent further closures. A significant rise in factory closures has emerged in Thailand, with 561 factories ceasing operations in 2024.

Why is Thailand losing 100 factories a month?

Like other ASEAN countries, Thailand has faced increasing challenges since 2018 and the onset of the first US-China trade war. Since 2021, the kingdom has been losing over 100 factories each month.

How many factories are closed in Thailand in 2024?

The FTI is calling for urgent government intervention to aid affected businesses. According to the Department of Industrial Works, the closures spanned from January to May, leading to 15,342 job losses, roughly 3,000 jobs per month. In 2024, 561 factories in Thailand, mainly in the steel and metal industries, shut down due to high production costs.

Why are Chinese factories closing in Thailand?

This trend sharply increases Chinese market penetration and hurts local producers. Since 2021, over 100 factories have closed every month in Thailand. Many are small and medium-sized enterprises (SMEs) in sectors like furniture, steel, garments, and electronics.
