## Glass solar Film

What is solar window film & how does it work?

When solar window film is applied to the glass of your vehicle, it provides an extra barrier of protection for increased safety by increasing the shatter resistance of the glass. Not only will the glass be more difficult to break, but the film helps hold shattered glass in place and prevents the shards of glass from flying around the vehicle.

What is a solar control window film?

Solar films are thin self adhesive materials designed for heat reduction, glare reduction, and UV control. Solar control window films are an efficient tool to enhance your comfort, and to help reduce your energy costs and energy consumption, and to lower your carbon footprint through savings in air conditioning costs.

What is solar film for buildings?

Solar film for buildings is the solution for increasing the energy performance of your glazing without having to change it. This solar window film comes with a 10-year guarantee for vertical application and a 7-year guarantee for tilted application.

Can window films be applied to a smooth glass surface?

Window films can be applied to any smooth glass surface on a window, door or conservatory roof. Our wide range of targeted solar control window films are available off the roll in a length of your choice, or cut to size to your exact measurements for ease of installation.
