
Grid Energy Storage ETF

What is GRID ETF?

GRID is an ETF with a focus on the energy sector. It includes companies of different sizes, from large-cap (over 44 percent) to micro-cap (approximately 2.5 percent). GRID is an ETF that was inceptioned on November 17th, 2009.

What is the iShares energy storage & materials ETF?

The iShares Energy Storage & Materials ETF seeks to track the investment results of an index composed of U.S. and non-U.S. companies involved in energy storage solutions aiming to support the transition to a low-carbon economy, including hydrogen, fuel cells and batteries.

What is an energy ETF?

An energy ETF focuses specifically on companies in the energy sector, typically including oil, natural gas, and renewable energy firms. These sector ETFs work by offering exposure to energy-focused indexes, which are predefined lists of companies selected and weighted according to a set of rules.

What are integrated energy ETFs?

Integrated Energy ETFs: These own large, integrated energy companies-- often referred to as "supermajors"-- that operate across upstream, midstream, and downstream segments. These ETFs offer all-in-one exposure to the full fossil fuel value chain with typically lower volatility. Example: Energy Select Sector SPDR Fund (XLE -0.98%)
