# Home energy storage subsidies in Milan Italy

Will Italy support a centralised electricity storage system?

The European Commission has approved, under EU State aid rules a EUR17.7 billion Italian scheme to support the construction and operation of a centralised electricity storage system.

How much money does Italy spend on solar power plants?

The Italian government has signed a decree to allocate EUR 320 million (USD 336.3m) in state funding to small and medium-sized enterprises (SMEs) willing to install self-consumption wind or solar power plants. Solar park in Italy. Image by: Iberdrola SA.

What is Italy superbonus solar?

The Italy Superbonus solar scheme has redefined what's possible in clean energy adoption. By removing upfront costs and returning more than the investment, it has empowered homeowners to go solar faster, smarter, and at scale. It's not just a subsidy--it's a national acceleration strategy for rooftop PV, energy storage, and building decarbonization.

How long does the res scheme last in Italy?

The scheme will run until 31 December 2033. The measure aims to facilitate the integration of renewable energy sources ('RES') in the Italian electricity system. The production of electricity by RES does not always coincide with periods of electricity demand.
