What is a solar inverter?

Inverters convert direct current (DC) electricity produced by solar panels into a sinusoidal alternating current (AC) of 220V, which is suitable for most electrical appliances. The assortment of inverters for solar systems on the market today is huge.

Which inverter is best for a detached house?

Leading manufacturers such as Huawei, Fronius and SolarEdge offer single-phase inverters with proven technology and high operational reliability. These solutions are particularly suitable for detached houses, carports or smaller roof areas and enable the efficient and cost-effective use of solar energy. What are 1-phase inverters?

What type of Inverter should I buy?

This equipment is ideal for installation in residential areas, is highly efficient, reliable and durable. Inverters with single-phase and three-phase alternation current output of 220 and 380 V are readily available in our online store. Three-phase models can be used in homes or industrial sites.

What are the different types of solar inverters?

The other popular type of inverter for solar panels is the central inverter. It functions similarly to a string solar inverter, but bigger and can handle several strings. They are used in commercial solar systems, where a lot of solar power has to be converted.
