
How long does an uninterruptible power supply take

What is a UPS (uninterruptible power supply)?

A UPS (Uninterruptible Power Supply) is an emergency power system that provides backup power when the main source of power is lost. It gives businesses valuable time to safely power down machinery or keep critical systems online until backup generators kick in.

Do I need an uninterruptible power supply?

An uninterruptible power supply (UPS), which is a battery that covers the 15-20 second delay between the time when the power goes out and the generator kicks in, is necessary for the generator. When you are ready for your new generator, call Jack Lehr Heating, Cooling & Electric at (888) 454-7365 or contact us online!

How long does a UPS last during a power outage?

The runtime of a UPS during an outage can range from several minutes to hours, based on a variety of factors. When recommending a UPS solution at Comnet Systems, we never forget to consider the following key variables: 1. Battery Capacity

How long do uninterruptible power supplies last?

Most uninterruptible power supplies have a lifespan of around 3-5 years (which the warranty will normally cover) and after that they're toast. This lifespan can be even shorter if you use the battery backup frequently. You can buy replacement batteries direct from the manufacturer and replace them yourself, extending the lifespan of the product.
