
How to install an outdoor AP base station

What are the different types of outdoor AP installation options?

There are basically four options in outdoor AP installation: wall mounting, pole mounting, corner mounting and roof mounting.

How do you install an outdoor access point?

The Process of Outdoor Access Point Installation Use a marker pen to mark the location of the installation holes on the wall. Use an impact drill to drill holes in the wall according to the marked positions. Use a hammer to tap the expansion bolts vertically into the hole. Fix the bracket on the wall with four M6 screws.

How do I install an access point?

The access point will fully cover the hole of the installation box. If you don't have used the installation box, then you can just mount the mounting plate on the ceiling. Just make sure that the cable is short enough to fit behind the access point. We will also need to connect the access point to your network.

Should APS be mounted on a pole?

Pole mounting is a good option when installing the APs away from the buildings, which is more common in a wireless mesh system where no cables need to be pulled to each location. It's ideal for providing a 360° overall coverage for your premises, but if the access point is mounted too close to the pole, the RF will be severely attenuated.

Hardware Installation The recommended mounting of the UniFi AP AC Outdoor is on a pole. Optionally, the UniFi AP may be installed on a wall using additional hardware. ...
