
How to set up Huawei Mini Mobile Base Station

Why is Huawei combining its R&D centers into one monolith?

By combining many of its R&D centers into one monolith, the company could streamline its operations and make collaboration between different departments much easier. This flagship project also shows how much Huawei is investing in future technologies.

Why does Huawei need a new R&D center?

Huawei needs to strengthen its research and development, especially as it bore the brunt of America's sanctions in the ongoing chip war between Beijing and Washington. By combining many of its R&D centers into one monolith, the company could streamline its operations and make collaboration between different departments much easier.

What can you do with a base station?

There's plenty of fun things you could achieve with such a base station: reverse-engineering of proprietary technology, security research, and probing for vulnerabilities through WWAN interfaces rarely considered as an attack surface. Maybe you could even set up your own cell network -- if you ever go sailing in neutral waters, that is.

Are 2G base stations still useful?

We've generally seen 2G base stations over the years, but with the sunset of 2G, those have only been useful in an increasingly low number of countries, and, every once in a while, a hacker camp. Need to debug your DIY network at some point?
