
Libya glass solar sun room

Is Libyan desert glass a good Talisman?

It is an incredible stone for self-actualization and healing. Libyan Desert Glass is a powerful talisman for connecting with the Sun and solar gods and goddesses, particularly the many Egyptian solar deities. While many cultures associate the Sun with masculine attributes, and the moon with feminine energy, this is not always the case.

What is Libyan desert glass?

Libyan Desert Glass is a rare tektite found in the Sahara Desert, on the border between Libya and Egypt. While it is always yellow, this gem has a slight hint of green when found in Egypt, and is a purer yellow when found in Libya. Tekites are a type of natural glass that is created when a meteorite strikes the earth.

Did ancient Egyptians know about Libyan desert glass?

Ancient Egyptians were aware of Libyan Desert Glass and treated it much like other precious gems. King Tutankhamun (1341-1323 BCE) was buried with a large pectoral, or breast plate, which had a golden-green Libyan Desert Glass carved into a winged scarab at its center.

How much sunlight does Libya have?

The 'Libyan Renewable Energy Authority' has estimated that the average solar sunlight hours are approximately "3200" hours/year and that the average solar radiation is 6 kWh/m²/day (Mohamed et al., 2013).

? Ancient Use & Sacred Significance Perhaps most famously, Libyan Desert Glass was used in the burial treasures of the Egyptian pharaoh Tutankhamun. His iconic pectoral ...
