
Morocco small solar power generation system parameters

Does Morocco have a solar energy plan?

The development of solar energy in Morocco follows the Moroccan Solar Plan(Noor),which implies a growth of the installed solar power capacity (Photovoltaic power station,PV,and Concentrating Solar Power plants,CSP) up to 4,800 MW,or 20% of all installed renewable capacities,by 2030.

How to assess solar energy potential in Morocco?

In order to assess the solar energy potential, the sunshine duration, various components of radiation balance, the albedo of the underlying surface and other actinometrical parameters are usually used. For Morocco, a methodology for choosing the optimal location for the placement of solar power plants was specially developed .

What is the Moroccan solar energy Plan (MSP)?

The Moroccan solar energy plan (MSP), which is one of the pillars in the implementation of the MES, aims to increase the share of solar energy in electricity production [54, 55]. The main expected outcomes of the MES are as follows. RE will account for 52% of total installed electrical capacity before 2030, and 70% by 2040.

How much energy does Morocco use?

It consumes approximately 36%of the total energy,with the residential sector alone accounting for 25% . Consequently,Morocco has shown its commitment to energy efficiency as a cornerstone of its adopted energy strategy.
