
New energy battery cabinet helium inspection equipment

What is the first helium detector?

The first primary helium detection equipment for ultra-low concentration cell First helium detector for back pressure of cell seal First pack accumulated helium detector The first pack high-speed helium suction gun inspection equipment The first full-automatic helium inspection production and test line for the complete air conditioner

Can China's helium detection technology go to the world?

It is hoped that through our continuous efforts, we will lead the development of helium detection technology and make China's helium detection go to the world. Headquartered in Jinshan District, Shanghai, the company is a high-tech enterprise integrating R&D, production and sales.

What is UHT helium detection?

UHT, founded in 2016, is committed to researching more reliable leakage detection methods and creating value for customers. It is hoped that through our continuous efforts, we will lead the development of helium detection technology and make China's helium detection go to the world.

As a supplier committed to providing first-class quality helium detection system solutions, the products of UHT are widely used in automotive ...

This customizable visual inspection system is specifically designed for new energy components such as battery casings, electrode sheets, and motor parts. It leverages AI-powered visual ...

Huijue's BESS feature cutting-edge battery technology, modular design, and intelligent management systems, ensuring seamless integration and cost-effective operation. Trust ...

Helium Detection Technology in the New Energy Industry The sealing of battery packs and cells is crucial to their performance and safety. In order to prevent liquid leakage and impurity mixing ...

Cooperate with BYD to provide ammonia detection equipment for its new energy batteries The helium inspection equipment for the aluminum caps of 100 square batteries in the world has ...

Sealing testing equipment for automotive energy storage batteries This equipment is a helium inspection machine after sealing and welding of the liquid injection hole of the steel shell ...

New energy battery end cap helium inspection machine New energy battery end cap helium inspection machine for Vacuum Chamber Helium Leak Test System by HJ ...

As a supplier committed to providing first-class quality helium detection system solutions, the products of UHT are widely used in automotive parts, new energy automotive batteries, ...

We are dedicated to providing quality New Energy Vehicle Battery Direct Cooling Plate Helium Inspection Machine for customers. We provide you with the best products and the best after ...

On November 28, 2023, the 8th International Summit on power battery applications (cbis2023) was grandly opened in Shanghai, announcing the official launch of the annual new energy ...

Industry forecasts show that all-solid-state batteries will occupy 30% of the new energy market in 2030, and helium leak detection technology will become the "invisible ...

Bulkbuy New Energy Battery End Cap Helium Inspection Machine price comparison, get China New Energy Battery End Cap Helium Inspection Machine price comparison from Helium Leak ...

It is worth noting that Duofuduo Company has become Guangshun's current top customer in the domestic large round battery helium inspection equipment field, and this award is the strongest ...

Helium inspection customers, different industries, different customers, different needs. But the same industry and the same type of products require different services. Leak detection service ...

This equipment is a standard equipment developed for lithium battery PACK package sealing testing. The host equipment is equipped ...

Shop premium energy storage cabinets with IP65/IP55 rating, liquid/air cooling, LiFePO4 batteries & customizable options. Fast delivery, high safety, 100kWh-3.7MWh capacity.
