
Norway Communications 5G base stations are universal

Does Norway have a 5G network?

Telia has delivered a private 5G network to Norway's armed forces in which mobile traffic is separated from the rest of the national network, providing flexible and secure communication.

Can a 5G base station be flown by a drone?

This summer, Telia partnered with rescue services in Norway to test a battery-powered, satellite-connected 5G/4G base station that can be flown by drone, allowing quick restoration of mobile coverage after natural disasters or extreme weather. Ericsson is Telia's technology partner for the Norwegian 5G rollout.

Will Norway become the world's most digitalised country by 2030?

Four years after switching on Norway's first 5G base stations in the town of Lillestrøm, Telia's 5G network now covers close to 99 per cent of the population. Telia says it is now delivering nationwide 5G coverage in Norway before any other operator, and opens up new use cases in a country aiming to become the world's most digitalised by 2030.

What are the 5G regulations in Norway?

There are no specific 5G regulations in place. However, the Norwegian Electronic Communications Act (Ekomloven) says that authorities may order providers with significant market power to meet any reasonable request to enter into or amend an agreement on access to electronic communications networks and services.
