How much money does off-grid solar need?

To achieve universal access, the off-grid solar sector would require between \$6.6 billion - \$11 billion in additional financing. Of this total need, \$6.1 -- \$7.7 billion will need to come from investments into off-grid solar companies, and up to \$3.4 billion represents public subsidies to bridge the affordability gap.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.
