
Outdoor base station wiring

What is a dib-r5 outdoor base station?

The DIB-R5 outdoor is a base station suitable for outdoor and indoor operation. The DIB-R5 outdoor has been developed for outdoor operation under harsh conditions and can be flexibly mounted providing radio coverage exactly where it is needed.

Does a base station need a disconnect device?

The base station has no integrated disconnect device so it needs to be equipped with a disconnect device by installation. For PLUGGABLE EQUIPMENT, the socket-outlet shall be installed near to the equipment and shall be easily accessible, e.g. power supply source plug. The base station is equipped with an internal FUSE (F8002) Rated 125V/5A.

How do I install the dib-r5 outdoor antenna?

The DIB-R5 outdoor must be connected to the grounding system. Appropriate antenna cables of the required lengths must be available. The power source must be switched off. If required, remove the protective caps from the antenna connectors. Install the surge arresters, refer to § 5.4 "Antennas" on page 56.

Does the dib-r5 outdoor have a power supply connector?

Every unit features a bipolar power supply connector for the power supply. For grounding the DIB-R5 outdoor is equipped with a separate connector. The DIB-R5 outdoor is equipped with internal fuses. Insufficient fuse protection of the power supply may impair the operation of the product. The dimensioning of circuit breakers depends on
