
Portable soldering iron power supply

What is a fixhub smart soldering iron & portable power station?

The FixHub Smart Soldering Iron and Portable Power Station is a USB-C-powered soldering iron that reaches soldering temperature in under five seconds. It's beginner-friendly and perfect for repairing electronics.

What is a smart soldering iron?

The Smart Soldering Iron and Portable Soldering Station are set to revolutionize the world of soldering, combining portability and ease of use with powerful, precise performance in a way that no other soldering iron has before.

What is a portable soldering station?

Compact Soldering Station: The Portable Soldering Station is an adaptable, compact tool for any workspace. Take it with you on the go or replace the bulky soldering station on your workbench. USB-C Power Source: Charge your smartphone, laptop, or other electronic devices with 100 watts of USB Power Delivery output.

What is a basic soldering iron?

A basic soldering iron is a metal tip connected to a handle with a power source, often a plug. This design can be limiting, as it tethers you to a wall outlet. Kyle Wiens, iFixit's founder, encountered this issue while fixing a car stereo.
