Will a Solar Park transform Riga into green energy?

Home Port News Major solar park set to transform port of Riga into green energy... On 9 September, an agreement was signed between the Freeport of Riga Authority and Lithuanian company SNG Solar for the lease of land in the Spilve Meadows area of the Latvian port.

What's going on in Riga?

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the installation of solar panels, the production and storage of renewable electricity, and the development of hydrogen and alternative fuel technologies.

How much green energy will the Freeport of Riga generate?

According to the auction result, the annual rent specified in the contract amounts to EUR233,251 (\$258,714 million) and the amount of electricity to be transferred to the Freeport of Riga Authority will be 2.5 per cent of the total green energy produced, which will be further used for the maintenance of the port infrastructure and operation.

How much will SNG solar invest in Freeport of Riga?

SNG Solar won the auction organised by the Freeport of Riga Authority for the land lease right and at the beginning of May the Freeport of Riga Board decided to enter into an agreement with the Lithuanian company. The total investment in the park is expected to be between EUR60 (\$66.58 million) and EUR80 million (\$88.76 million).

Professional mobile solar container solutions with 20-200kWp solar arrays for mining, construction and off-grid applications.

The BCT solar panel park is the second green energy production plant that has started its operation in the territory of the Port of ...

The initial introduction toward the sustainable infrastructure has opened the door to realizing the new innovations in remote communication networks. The conventional power ...
