
Rural household hanging solar lights

What is a solar lantern?

Solar Lantern - Hanging Solar Lights Outdoor - 2 Pack Solar Powered Waterproof Led Lanterns Vintage... This is an intricate and beautifully layered solar lamp that will enhance both the decor and the ambiance of any outdoor space you choose to hang it.

How big is a solar lantern?

Each lantern has its solar panel on top and its more or less 5 inches in diameter, a perfectly good size to shine in any type of outdoor space, even a small balcony. It has a simple on/off switch, and when on and charged, it will light up automatically in the evening.

Can you use a solar panel outside?

It's weather-proof so it can be used outside without any problem, and as it is so easy to hang, it can also be used inside, as long as the solar panel receives enough sunlight during the day. It's powered by the sun, so this is a good way to start cutting down your carbon footprint.

How do solar lights work?

The solar panel that powers these lights are compact and efficient: when placed under direct sunlight for 6 to 8 hours, the 1.2V 1200mAh batteries will keep the lights on for 8 to 10 hours at night, when the switch is turned to ON, the panel will charge the battery and once daylight has dimmed out, the bulbs will turn on automatically.

These lights can be used to brighten outdoor patios, gardens, and communal spaces in rural areas.
