# Solar container battery warranty standards

What is a solar battery warranty?

Solar battery warranties vary by manufacturer and product. A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery.

When do solar battery warranties expire?

Solar battery warranties typically expire when the first of three conditions are met: A solar battery's warranted life is the number of years the manufacturer guarantees the performance of the battery, typically it is set at 10 years from the date of installation.

How long does a battery warranty last?

A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery. Battery warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment.

Do Australian batteries have a 10-year warranty?

Australian warranties look simple-- "10-year warranty" splashed across brochures--but the real coverage rests on four intertwined promises. Understanding those promises and how they interact with your own energy habits and ACL protections ensures you pick a battery that will serve your household for the long haul.
