
Solar module exports rise

Are China's solar module exports increasing or decreasing?

In May 2024, China's solar module exports showed a notable trend: higher volumes but lower prices. Data from the General Administration of Customs and calculations by Solarbe indicate that while the export value is decreasing, the volume continues to rise.

How many solar modules does China Export in 2022?

This is equivalent to about 84 GW of modules, more than half of China's total module exports in 2022.

According to Tan Youru, an analyst at BloombergNEF, China exported 212 GW of solar cells and modules in the first 10 months of 2023, some 19 percent more than exports in the whole of 2022.

Did China Export more solar cells in the first 10 months?

According to Tan Youru, an analyst at BloombergNEF, China exported 212 GW of solar cells and modules in the first 10 months of 2023, some 19 percent more than exports in the whole of 2022. While the value of solar product exports from China was flat in the third quarter, volumes rose month-on-month, thanks to lower module prices, he said.

Are India's solar module exports rising?

Data from the Commerce Ministry show a 30.7% rise in India's solar module exports between April and October 2025, with values increasing by \$219.2 million--from \$712.8 million to \$932 million.

India's solar module exports surged 20.5% year-on-year to \$668 million during the first four months of the current fiscal, while shipment volumes rose 30% to 4.6 million units.

The export of Indian photovoltaic (PV) modules has risen exponentially by more than 23 times between Fiscal Year (FY) 2022 and ...

India's demand for solar cells sees exports of the product from China increase by over 70% in the first half of 2025, doubling to 40% of all solar products as solar panel exports ...

China's solar PV module exports hit 236 GW in 2024, with growth in all regions except Europe ... China exported 16.63 GW of modules in December 2024, up 9% MoM from ...

The value of photovoltaic products exported by China hit a record in the first 10 months of 2023, with industry experts saying the momentum will persist through the year, ...

To the Middle East, Chinese solar module exports totaled 2.43 GW, a 2% MoM and a 31% YoY decline in the month of September. ...

Key Takeaways Chinese solar module exports declined 11% YoY during 2M 2025 as manufacturers prioritize domestic demand. While Europe, Asia Pacific, the Americas and ...

Solar cell and solar wafer exports from China increased significantly during the first half of the year, according to analysis by London-based think tank Ember Energy. Figures from ...

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

In May 2024, China's solar module exports showed a notable trend: higher volumes but lower prices. Data

from the General Administration of Customs and calculations ...

In May 2024, China's solar module exports showed a notable trend: higher volumes but lower prices. Data from the General ...

Declining imports, rising exports Despite India's massive expansion in solar energy, the sharp rise in domestic module production ...

India has traditionally been among the largest consumers and importers of solar photovoltaic (PV) modules, but with the Indian government's push for domestic manufacturing, ...

Solar cell and solar wafer exports from China increased significantly during the first half of the year, according to analysis by ...

Solar module imports saw a sharp decline of 73.2%, while solar cell imports fell by 17%. This decrease in imports was largely due to ...

China Photovoltaic Industry Association (CPIA) notes that China's solar market in 9M 2025 moved unevenly at home, with a policy-driven, 'pulse-like' jump in installations ...
