
Solar panels installed on roof tiles

How do you install solar panels on a roof?

A cost-effective and time-efficient way to deploy solar power is by installing solar panels on these roofs. The mounting process is akin to that of an on-roof system, with the rails secured to the roof ridges using self-tapping screws. This setup keeps the solar panels close to the roof to reduce wind impact.

Can I install solar panels on a concrete tile roof?

Some companies may tell you that you can't go solar or that they won't do the install, but that is not the case. If you have a concrete tile roof, there are two common ways to go about installing solar panels on a concrete tile roof. First, your installer can put S-hooks under the tile for your system to be mounted on.

Can solar panels be installed on a slate roof?

Solar panels can be installed on slate roofs, which are very flat. When fitting solar panels to slate roofs, the fixing bracket used will typically take the solar panel very close to the roof to achieve a nice low-profile appearance.
