
Solar panels replace awning prices

How are solar canopies & awnings changing how we use solar energy?

Solar canopies, awnings, and walkways are changing how we use solar energy. If you want a simple setup or a custom design, Lumos offers smart, flexible, and efficient solutions. Lumos solar canopies, awnings, and walkways use bifacial panels that collect sunlight from both the front and back.

What is a solar awning?

Maximize your space with Lumos Solar Awnings. Solar awnings offer a combination of practical use and green energy, transforming buildings into power-generating hubs while enhancing architectural appeal. Lumos specializes in designing solar awnings that fit into structures, providing energy efficiency, shade, and style all in one package.

How much does a new solar system cost?

The complete customizability of a new solar structure is a major benefit, but it also adds significant expenses to your installation. An average 6-kilowatt solar panel system costs \$13,300 after tax credits, and patio covers and other structures can cost thousands of dollars to build.

What is the difference between Lumos solar awnings & canopies?

In considering your solar panel shade structure designs, please note: Lumos canopies are separate structures, while our awnings are attached to buildings by support posts. Our walkways can either be independent or attached depending on your unique needs. Lumos Solar Canopies are all about enhancing spaces with sustainable design.
