Can a portable power station be turned into a solar generator?

Using DJI's solar panels, you can turn your portable power station into a solar generator. This setup provides all the unlimited energy the sun has to offer, without the noise, pollution or recurring fuel payments associated with a traditional generator.

Can a DJI portable generator be used as a solar generator?

DJI portable generators are built to be mobile, last, and produce power. Whether it is powering your mini-fridge, charging your drone or running tools, wherever you are. Using DJI's solar panels, you can turn your portable power station into a solar generator.

What is a solar generator?

The term solar generator, as you often see it used these days, is a bit of a misnomer. The device commonly referred to as a "solar generator" is often actually a portable power station - a large battery - with the ports to accept electricity from solar panels. And that's the problem: That's only part of a solar generator.
