## Solar powered portable outlet in Romania

What type of power outlet is used in Romania?

The power outlets used in Romania are type F and are commonly referred to as "Schuko plugs." They are the most common type of outlet in Europe. Type F outlets are compatible with Type C and E plugs that are also commonly found throughout Europe. In Romania, the electricity's standard voltage is 230 volts with a standard frequency of 50 hertz.

Do I need a power adapter in Romania?

If your devices are compatible with these specifications, you will not need a power adapter. However, if your devices use a different plug type or are not compatible with the voltage in Romania, you will need a power adapter and/or a voltage converter/transformer. The standard voltage in Romania is 230 V, and the standard frequency is 50 Hz.

Do I need a travel adapter in Romania?

The electrical outlets and power plugs in Romania are of types C & F (see images). If your country uses the same electrical outlets and power plugs, you don't need a travel adapter. However, you may still need a voltage converter if the voltage is different.

Which plug type is best for Romania?

Despite being bulkier than the Europlug, plug type F is a widely used and reliable option for those traveling or living in the regions where it's used. Ensure your devices have compatible plugs or bring an appropriate power adapter to use them in Romania. [Power Adapter for Romania?](#)
