# South America energy storage installed capacity in 2025

Energy storage deployments globally grew 53% in 2024, with grid-scale segment the driver of this, market intelligence firm Rho Motion ...

According to the International Energy Agency (IEA), South America's energy storage capacity is predicted to increase by more than 5 GWh by 2025, with portable electronics playing a crucial ...

Introduction In recent years, Latin America has become one of the fastest-growing renewable energy regions in the world. Driven by supportive policies, high electricity costs, ...

The Latin American region will see a compound annual growth rate of 8% for its energy storage market through 2034, reaching a total of 23 gigawatts (GW), according to ...

As South America's renewable energy sector accelerates toward decarbonization, battery energy storage systems (BESS) have emerged as critical enablers for grid reliability ...

You know, South America's installed solar capacity grew by 217% between 2020 and 2024, but here's the kicker - Chile alone wasted enough solar energy in 2023 to power 380,000 homes.

The region is forecast to expand steadily over the next decade, with Chile accounting for nearly half of the total capacity, the firm said in its Latin America Energy ...

Brazil installed 6.4 GW of distributed solar capacity between January and September 2025, down 12% from the same period in 2024, ...

Wood Mackenzie forecasts a compound annual growth rate (CAGR) of 8% in the Latin American energy storage market through ...

We explore the data to see where the clean energy transition stands today, from rising investment and job growth to grid needs and critical mineral demand.

The IRENA Renewable Capacity Statistics 2025 highlights the continued progress made in the global energy transition. This latest edition illustrates the growth of renewables in newly ...

Hydropower drives South America's energy future, with certified sustainability projects, hybrid systems, and vast untapped ...

Established a national energy storage policy to promote investment in the energy storage sector. Requires renewable sources (5 to 10 MW) to have a storage component.

The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new ...

Home &#187; Energy & Power &#187; Energy Storage &#187; South America Energy Storage Market - Size, Share, Trends, Analysis & Forecast 2025-2034 All our reports can be tailored ...

South America's energy transition requires substantial investments in storage, back-up capacity and new grid infrastructure to manage variability and maintain reliability.
