

Standard distribution box container base station

What is container type unitized compact substation?

Container type unitized compact substation Container type unitized CSS compact substation is a complete type tested per latest IEC standard 62271-202 which is comprising a outdoor enclosure containing medium voltage (MV) switchgear, power or distribution transformers, low voltage (LV) switchboards.

What is a containerised substation?

Containerised substations are perfect for customers who need portability and flexibility when it comes to using their substations. They are suitable for temporary supply or if supply is needed in different areas of the site. The containers are fully equipped and assembled prior to delivery, allowing for minimal site and civil works.

What is a small distribution substation?

Smaller distribution substations are subdivided into container-sized modules, which can be manufactured, assembled and tested at the factory, allowing easy transport and fast installation and commissioning at site.

Does Bowers supply containerised substations?

Bowers supplies containerised substations, utilising either new or refurbished modified containers, with HV & LV switchgear and transformer fitted integrally. Containers are offered as standard or bespoke packages to suit the client's requirements.
