## The neighbor in front installed solar panels

Can solar panels cause glare for neighbors?

Solar panels can create glare and reflect light toward your neighbor's home at certain times, depending on the angle of the panels and the sun. Even though most panels have an anti-glare coating to help them be more efficient, they can still cause severe glare at the wrong angle.

Are solar energy systems affecting your neighbors?

If solar energy systems installed on your property are adversely impacting your neighbors, several steps can be taken to address the issue efficiently and amicably. 1. Open Communication: Initiating a dialogue with neighbors can often resolve misunderstandings, fostering goodwill. 2.

What are common complaints from neighbors about solar panels?

Complaints about glare and aesthetics are more common when installing solar panels, especially if you live in a residential estate or complex. Neighbors may also complain if they weren't aware that you were going to install solar panels.

Can My Neighbor plant a tree over my solar panels?

For example, let's say your solar panels existed before your neighbor planted an oak tree that creates shade over your solar panels. The law protects your right to sunlight. Your neighbor cannot plant a tree blocking the sun after your solar panels are installed.
