# There are many battery exchange cabinets at South Ossetia sites

How many batteries can a 4th generation battery swap station store?

This new type of station is a modular extension unit that can be attached to existing battery swap stations, increasing the number of batteries available. Currently, fourth-generation stations can store up to 23 batteries.

Is Nio launching a new battery swap station system in 2024?

As reported by EV on January 2, Nio has filed a patent for a new expandable battery swap station system in the final days of 2024. This new type of station is a modular extension unit that can be attached to existing battery swap stations, increasing the number of batteries available.

Should a battery swap station be called a "battery swap hub"?

"I've always felt this thing shouldn't be called a battery swap station, because the trendy term now is 'Battery Swap Hub,'" he added. Nio currently operates more than 3,270 battery swap stations in China and provided over 72 million battery swaps since 2018.

To this end, some industry insiders said, "There are difficulties in establishing a unified battery standard. Take the cell phone battery for ...
