
Uninterruptible power supply procurement EK in Rotterdam the Netherlands

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is used for various applications such as computer, telecom, industrial, or medical equipment. It's crucial for applications where power must not fail, for instance, within operating rooms, data centers, tunnels, and telecom networks.

What is a 3-phase uninterruptible power supply (UPS)?

A 3-phase uninterruptible power supply (UPS) plays a vital role in data centers, edge computing environments, or commercial or industrial applications where uptime and data integrity are critical.

What are the different types of ups maintenance contracts?

ELINEX offers three different contract forms for maintaining a UPS solution: preventive, corrective, and predictive maintenance. Various response times can be chosen: next business day, on-site within 8 hours, and on-site within 4 hours. The contract can include multiple options regarding the maintenance to be performed.
