# Vietnam's second batch of energy storage projects

Can battery energy storage systems stabilize Vietnam's grid?

Sunita Dubey and Hyunjung Lee share how Vietnam is leveraging Battery Energy Storage Systems to stabilize their grid and accelerate the energy transition.

Can BESS be integrated into Vietnam's power grid?

In an effort to facilitate the integration of BESS into Vietnam's power grid, the Electricity and Renewable Energy Authority (EREA) of the Ministry of Industry and Trade recently hosted a technical workshop in collaboration with GEAPP.

How is Vietnam advancing its energy infrastructure towards an energy-resilient future?

Vietnam is advancing its energy infrastructure towards a greener, more just, and energy-efficient future, simultaneously providing a valuable model inspiring the global drive towards an energy-resilient future.

What is battery energy storage system (BESS)?

Battery Energy Storage Systems (BESS) play a pivotal role in addressing these challenges by minimising the intermittency of renewables, enhancing grid flexibility, and ensuring reliable power supply. In a significant development, Vietnam Electricity (EVN) has secured approval for its first pilot BESS project with a capacity of 50 MW/50MWh.

From June 24 to 27, 2025, the China Energy Storage Alliance (CNESA) organized a delegation to Vietnam for an in-depth market study and exchange. The delegation focused on the current ...

One of the key highlights of Vietnam's revised Power Development Plan VIII (PDP8) is the significant increase in the targets for Battery Energy Storage Systems (BESS).

Vietnam greenlights two new solar power plants and two large-scale battery storage systems (BESS) in its northern provinces to ...

The Government of Vietnam and the International Partners Group (IPG) have identified 24 energy projects as eligible for support under the Just Energy Transition ...

Written by Partner Duyen Ha Vo On 31 August 2023, Vietnam's Deputy Prime Minister Tran Hong Ha signed Decision 1009/QĐ-TTg ...

EVN's 50 MW Battery Energy Storage Systems (BESS) pilot project, in collaboration with ADB and GEAPP, aims for 300 MW by 2030.

At the same time, the demand for battery energy storage systems (BESSs) is accelerating, driven by Vietnam's abundant renewable energy (RE) potential, particularly in ...

From June 25-27, 2025, at the International Exhibition Center (ICE Hanoi), the 2nd Vietnam International Exhibition on Battery, Accumulator and Energy Storage Technology will ...

These factors create favorable conditions for the initiation and scaling of Vietnam's domestic electrochemical energy storage market. Against this background, this article ...

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for

---

solar power, introducing ...

Climate and energy transition consultant Sunita Dubey on work done to put Vietnam on the global energy storage map and the pathway forward.

Additionally, the energy storage systems of solar and wind power projects will be considered products eligible for tax incentives ...

Climate and energy transition consultant Sunita Dubey on work done to put Vietnam on the global energy storage map and the ...

Following similar pieces in 2022/23, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024.

One of the key highlights of Vietnam's revised Power Development Plan VIII (PDP8) is the significant increase in the targets for Battery Energy ...

- Finalizing and analyzing the results of "Scientific conference on application of energy storage systems and technologies to improve ...
