
Where are the 5G base stations built by Paraguay Communications

Will Claro & nubicom get 5G in Paraguay?

Claro and Nubicom win spectrum - Both companies secured 200 MHz each in Paraguay's 3.5 GHz band, with 5G rollouts expected in early 2026. New entrant faces challenges - Nubicom, an Argentine ISP without mobile infrastructure, must establish operations and build a network from the ground up.

When will 5G start in Argentina?

Operators have six months to begin infrastructure deployment, with commercial 5G service expected to launch between March and April 2026. Nubicom, which currently provides fixed internet services in Argentina's Salta province but has no mobile infrastructure in either Argentina or Paraguay, will have to build a mobile network from scratch.

Where is the first 5G base station made?

Back in July of last year, Verizon received the first U.S. manufactured 5G base station from a facility in Texas. Pictured is Verizon's CTO Kyle Malady holding some of the hardware. Image used courtesy of Ericsson

Is a 5G spectrum auction a success in Paraguay?

The U.S. Embassy in Paraguay has welcomed the country's recent 5G spectrum auction, calling it a success despite limited participation and criticism over its restrictive terms. The U.S. mission praised the process for aligning with Washington's stance on banning Chinese technology from critical telecom infrastructure.
