
Wholesale gfci breaker wiring in Sydney

What is a ground fault circuit interrupter (GFCI)?

A Ground-Fault Circuit Interrupter (GFCI) is a safety device designed to protect people from electrical shock by monitoring the electrical current flowing through a circuit. It detects imbalances between the hot and neutral wires, which can indicate a ground fault where electricity is leaking out of the circuit.

Why are GFCI outlets important in Australia?

In Australia, Ground Fault Circuit Interrupter (GFCI) outlets, known locally as Residual Current Devices (RCDs), are crucial for preventing electrical shocks. These devices are essential in areas where there's a risk of water contact, such as kitchens, bathrooms, and outdoors.

How to wire a GFCI outlet with a residual current breaker?

Residual Current Breaker with Overcurrent Switch off the main circuit breaker to ensure the power supply is OFF before wiring a GFCI outlet. Use the suitable voltage and ampere rating of the switch with the appropriate wire size and proper size MCB according to the load rating.

Where can I buy GFCI breakers?
